

Highjolt

HIGHJOLT

A sports flooring made from natural/synthetic calendered and vulcanized rubber.

The flooring consists of a monochrome base containing granules of identical composition, vulcanized onto a load-bearing subfloor.

The flooring, produced in square panels, is installed according to a special interlocking system based on high-precision computerized cutting. No welding of joints is required.

- Non-slip
- Ideal for supporting concentrated, continuous stress and pressure
- Perfect joints thanks to the high-precision computerized cutting system

SUITABLE FOR

Indoor Sport Facilities

- Fitness/Cardio
