Durable, flexible adhesive for the installation of synthetic turf

The new generation of synthetic turf for sports fields can match the properties of natural grass, and even exceeds natural grass with regard to playing properties, maintenance costs and wear. But, sports-related and technical specifications are determined not only by the type of synthetic turf but even more so by professional installation using the proper adhesive products. A synthetic turf must not only meet the requirements of the specific sports with their extreme wear characteristics, but also has to withstand constantly changing ambient conditions such as rain and moisture, frost and snow. Consequently, an adhesive is required that has been specifically formulated to meet these extreme conditions.

1:0, Advantage IBOLA R 201

IBOLA R 201, manufactured by STAUF, meets all requirements for professional, durable bonding of all types of synthetic turf. With IBOLA R 201 we help our clients meet the strict installation guidelines in order to obtain UEFA and FIFA certification. For sports other than soccer, IBOLA R 201 scores as well with its well-balanced properties, so that tennis, field hockey, cricket, baseball, rugby and other sports poses no real challenge which has not already been mastered somewhere on the planet. For IBOLA R 201 and other STAUF synthetic turf adhesives, STAUF offers the matching accessories such as seaming tapes, adhesive applicators and the proper installation tools.

IBOLA R 201

Solvent- and water-free 2-part polyurethane adhesive for installation of synthetic turf on suitable seaming tapes - for indoor and outdoor use

Special features

- very economical
- excellent ridge formation
- catalyst for acceleration of the hardening process available
- no foaming
- installation possible also in extreme climatic conditions (light ground frost, tropical heat)

Suitable for installation of

- Synthetic Turf

Suitable sub floors

- Grit or PU-rubber granulated material

Polyester fleece to be used as seaming tape for bonding of synthetic turf installations.

Adhesive applicator machine for efficient application of synthetic turf adhesive to Seaming Tape.

Available packaging: 12 kg plastic bucket + 1,71 kg hardener,
12 kg metal bucket + 1,71 kg hardener
Packaging Unit per pallet: 33 pieces
